

DEVELOPMENT CENTRE

SMS strives to identify the right technologies, capabilities, capacities and flexibility required at the right time in the right product idea phase.

Investing in cutting-edge tech

This allows us to offer resources such as engineering, design for manufacturing, supply chain optimisation, prototyping, failure analysis, testing, production and transfer, whilst addressing current and emerging market needs.

NEW - Mycronic – MY600 Jet Printer – State-of-Art Development

- Flexible EMS equipment
- Complete volume control
- High performance platform
- 100% software driven
- High speed non-contact jet printing nozzle
- More component placement - changeover times that are next to zero

Mycronic – MY200SX Placement

- Volume to NPI and back
- Switching between batch sizes
- Handling and traceability
- High speed, high precision
- Smarter software
