

TECHNOLOGY DRIVEN STATE-OF-THE-ART DEVELOPMENT

SMS is structured to ensure customers never get lost in the system, irrespective of their size or product type.

SMS can build from single digit, to volume manufacturing for high-mix applications. Typical batch sizes range from one or two pieces, right through to several thousand.

Equipment:

SMT Placement

- MY200 SX
- MY12

Reflow

- Asscon VP 850
- Asscon VP 450

Printing

- MY600 JP
- Essemtec Manual print paste

Inspection

- DCB Automation Supervision
- Vision x90 camera
- Vision Mantis elite x2
